

THE ADVENTURES OF THE

Clocktower Kids

Recycling Center

ORANGE
COAST
COLLEGE

Welcome to The Clocktower Kids Adventure Series

The Clocktower Kids are a hearty clan of energetic students who are always looking for a new adventure. Orange Coast College is alive with wild and fun-filled opportunities for these young pirates and friends!

The Clocktower Kids Adventure Series is a publication of Orange Coast College.

Re-Pete! Connie! Krusty! Hop to!
We're going to be late for your field trip!

Good morning children! Who can give me an example of a recyclable material??

*Orange POP!

*Grape FIZZ!

Good work!
Who's ready to visit the Recycling Center?

Michael Recycle, head of OCC's Recycling Center, knows a thing or two about **REDUCING, RE-USING, AND RECYCLING**. The Recycling Center processes 60,000 aluminum cans per day, 20 tons of glass bottles per week, and 1,040 tons of paper per year!

We should never underestimate the power of recycling, and the difference it can make in our world. For example: did you know that the paper we recycle here at the center saves more than 17,000 trees per year? Does anyone know what can be made from recycled paper?

Howdy Mike!

BOOKS!

CLOP!
CLANK!
SCREEECH!!

Dean Uptight??!?

Errmm... don't forget that metal can be recycled too... just like this suit of armor that I had made from 100% recycled cans!

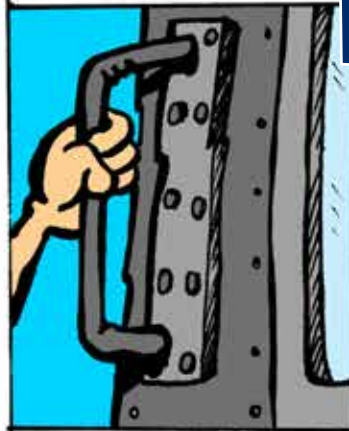

Just what I ALWAYS wanted!

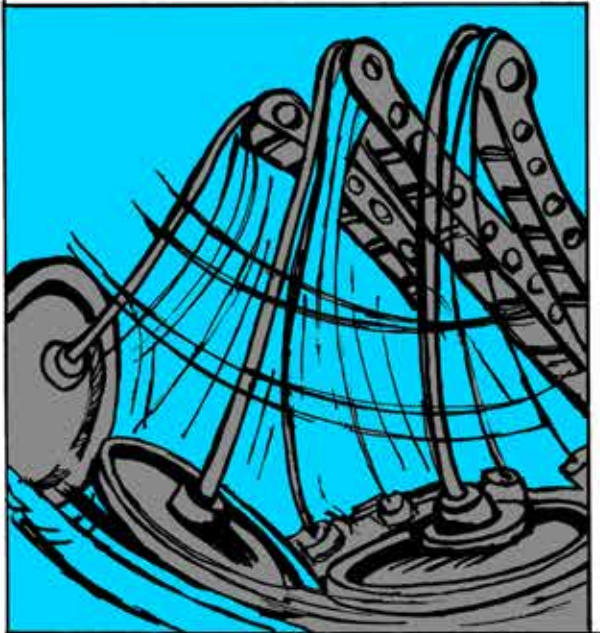

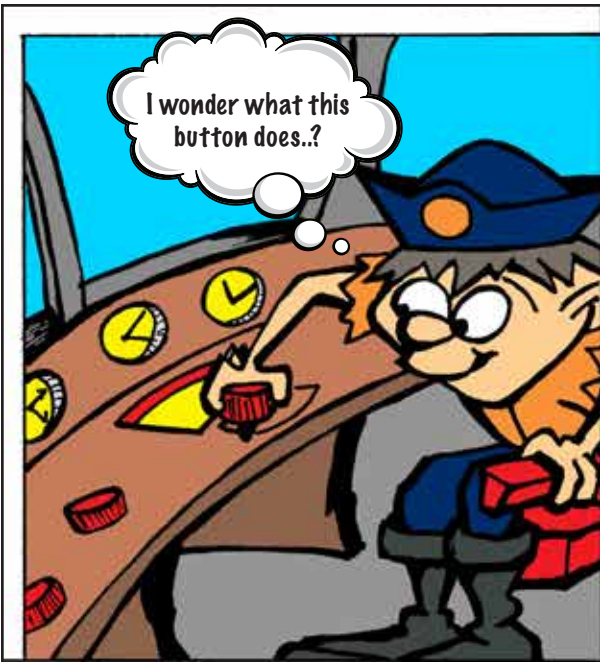

A PUPPPPPYYYYY!!!

As I was saying, it's all in this report you see, metal cans are collected, then crushed and assembled into large bales...

Meet the Clocktower Kids!
