

Program Goals:

1. Students will be clinically competent and ready to begin a successful career in the Radiologic Sciences.

Student Learning Outcomes for Goal 1:

1. Students will be able to perform entry-level radiographic procedures.
 2. Students will be able to demonstrate radiation safety and ALARA principles.
2. Students will be able to demonstrate professional and ethical behaviors.

Student Learning Outcomes for Goal 2:

1. Students will be able to express the characteristics of providing humanistic healthcare.
 2. Students will be able to demonstrate age specific patient care skills.
 3. Students will be able to demonstrate professional and ethical behaviors
3. Students will exhibit the communication skills necessary to effectively perform the duties of a Radiographer in a variety of health care environments.

Student Learning Outcomes for Goal 3:

1. Students will express effective oral communication skills
 2. Students will demonstrate written communication skills.
4. Students will demonstrate independent critical thinking skills to solve clinical practice related problems to optimize diagnostic outcomes.

Student Learning Outcomes for Goal 4:

1. Students will evaluate radiographic images for diagnostic quality.
2. Students will accurately modify technical factors to produce diagnostic quality images.
